

Kamal Rohilla

Delhi, India | kmlrohilla7065130@gmail.com | +91 8700455164 | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [LeetCode](#)

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML, CSS3, SCSS/SASS

Frameworks & UI: React 18, Next.js, Redux Toolkit, RTK Query, React Hook Form, MUI 5, Mantine, Tailwind CSS

UI Craft: Pixel-perfect & responsive web design, Component style guides, Design systems, Cross-browser compatibility

Browser & Web APIs: Fetch, IntersectionObserver, Web Storage, History/Routing, Web Workers, Clipboard, File & Drag-and-Drop

Testing & Accessibility: Jest, React Testing Library, jest-axe, WCAG 2.1

Tooling: Vite, Webpack, ESLint, Prettier, Yarn/NPM, Git

Observability & Analytics: Sentry, Datadog, Mixpanel, Microsoft Clarity

Other: REST APIs, CI/CD, Figma (design-to-code), Performance Optimization, Data Structures & Algorithms

Experience

Frontend Web Engineer, [Virtual Internships](#) – London, United Kingdom Dec 2023 – Present

- Built **pixel-perfect, responsive** UI components from **Figma design specs and component style guides** across desktop and mobile, with **cross-browser compatibility** and **WCAG 2.1 accessibility** enforced via jest-axe on every component.
- Architected the **interview scheduling system** end-to-end. Designed a custom **React Big Calendar wrapper** that became the foundation for every scheduling surface — implementing constraint-based slot booking, an availability API surfacing 30-minute interviewer slots, and bidirectional Google Calendar sync via a backend-generated OAuth URL (replaced the client-side SDK to harden the credential flow). Instrumented **Sentry User Feedback** and achieved **4.4/5 satisfaction across 1,000+ bookings**.
- Designed, built, and published **two standalone shared npm packages** — `fe-company-profile` and `fe-intern-profile` — with Rollup-based bundles, semantic versioning, and consumption across the customer-facing app and internal admin console. Authored the shared **component style guide / design system** (Typography variant system) now standard across the project, and drove a **page-load (LCP) optimisation** on the candidate profile header.
- Led the **EUI / Ant Design → MUI 5 design-system migration** across the platform — converted admin settings, internship management, notifications, media details, file inputs, and form components, authoring the **custom Typography variant system** in the MUI theme that became the project's standard for all visible text.
- Built the **internship assessment platform** end-to-end — replaced an external vendor tool with a fully in-product flow used by every internship cohort, with composable question primitives, keyboard-first navigation, and admin-side filters and columns.
- Shipped **AI-powered offer creation** that auto-drafts internship offers from candidate profile data — integrated the LLM endpoint, scroll-gated agreement flow, draft-resume support, and a **zero-layout-shift** drawer entry across desktop and mobile.

- Led the **candidate browse redesign** across three milestones — new filter system with **mobile-drawer parity**, AI-generated candidate summaries on cards, and Saved Search auto-save; integrated the new backend search contract and **eliminated layout shift** on filter changes.
- Delivered admin platform tooling — a **unified filter system across 10+ pages**, an **in-house data table** replacing a third-party grid, and interview request mode with a hiring-contact onboarding checklist, all built as a reusable, accessible component library.

Software Development Engineer I, [Housing.com](#) – Gurugram, Haryana June 2022 – Aug 2023

- Led the complete **dashboard revamp** focused on owner-side engagement, driving a **20% increase in user interactions** through redesigned information architecture and CTA hierarchy.
- Built a new **Package Pricing Overlay** for owner-specific users that drove a **30% lift in CTA conversions** and graduated to 100% rollout within one month.
- Owned the **A/B testing program across 8 features** — designed variants, analysed behavioural data, and optimised key user flows based on conversion insights.
- Revamped the **Leads Page** for owners by merging Potential Leads into a single view, streamlining workflow and improving conversion rates.
- Rebuilt the **package deletion, activation, and repost flow** with a payment-gated modal for free-listing users — ensuring posts only published post-payment and improving transaction handling.

Education

Delhi Technological University, B.Tech in Computer Science **Delhi, India** Aug 2018 – June 2022

- GPA: 8.76/10

Certification

- [Competitive Programming](#)
- [Data Structures and Algorithms](#)
- [Web Development Bootcamp by Angela Yu](#)
